

# SERA *Repeater Journal*

*The Official Voice of SERA, Inc.*

**Aug 2014**

**Published Quarterly**  
**\$5.00**

**Our wireless Hobby!**

Now what does this have to do with repeaters and repeater coordination?  
Half the folks couldn't find the Field Day Site without the use of fairly clear  
channel repeaters!

This is in Dacula, GA, Gwinnett Amateur Radio Society (GARS)

## **In This Issue**

### **Repeaters Subject to De-coordination**

A listing of repeaters that have not been updated for over two years. According to SERA Coordination Policy and Guidelines (CP&G), failure to certify the operation of a repeater annually will result in de-coordination. If a repeater on this list is not updated with current information by September 15, 2014, it will be de-coordinated and the frequency pair will be available for reassignment. To avoid de-coordination, contact your state Frequency Coordinator for assistance.

Repeater Owners and Trustees:  
If you Have Not Checked your repeater in the new UCS, Do it now!

Visit: [www.SERA.org](http://www.SERA.org)

## ITS TIME TO RENEW YOUR MEMBERSHIP IN SERA FOR 2015

The SERA Repeater Journal is still a bargain at \$30 for Full and \$15 for Associate Membership

SERA offers two types of membership. The most popular is the Full Membership which is available to repeater owners and trustees. SERA will mail the Repeater Journal to the member each quarter. An Associate Membership is also available and receives a copy of each Repeater Journal. Associate Membership is available to anyone interested in repeater operation.

1. It's easy to sign up or renew by credit card online at [www.sera.org](http://www.sera.org) with a secure payment in PayPal or you can print and mail the form on the website.
2. Full and Associate Membership expires at the end of each calendar year.
3. Either Membership can pay in advance for up to two years and avoid the chance of a price increase.
4. You are welcome to pay in advance for up to two years.
5. Renewals received between January 1 and August 31 will be applied to your membership for the current year.
6. Renewals received after September 1<sup>st</sup> will apply to the following year.
7. New memberships received after September 1, if received in time, will receive the November Repeater Journal and all of the following year.

**Numerous requests have been received from Full Members to only send them one (1) Repeater Journal rather than two (2). This was voted on and approved at the Summer Board of Directors Meeting, June 15, 2014, and will go into effect in January of 2015. This action may prevent a much needed price increase.**

*Thanks for your continuing support of the SouthEastern Repeater Association. Your membership supports repeater frequency coordination of over 3,000 repeaters in the eight state area for the enjoyment and service of all repeater owners.*

## REPRINT POLICY

The SERA Repeater Journal is copyright 2013 by The SouthEastern Repeater Association, Inc. Original material may be reproduced or printed by any organization without prior consent, with proper credit.

The SERA REPEATER INDEX may NOT be published or reproduced for distribution in any form, by any individual, publication, electronic source, or any other means without the expressed written consent of SERA, Inc. All other rights reserved.

## SERA Membership

### Full Repeater Membership

A repeater owner or club may join SERA as a Full Member if they have a properly coordinated and operating repeater on the air. A Full Membership application should be submitted online or with the application included in the Repeater Journal. A full member will receive two copies of the Repeater Journal each quarter to distribute as he or she wishes.

Full membership Representatives have voting privileges in SERA elections and may be eligible to hold elected offices within the organization. Go to [www.sera.org](http://www.sera.org) and fill out the online applications. Full Member dues are \$30.00 a year and membership runs from January through December 31st.

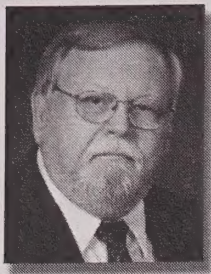

### Associate Membership

(A Membership for Repeater Users) Amateur radio operators, especially repeater users, are invited to join SERA as Associated Members. Only \$15 per years will enable you to support the organizations and receive the Repeater Journal. Associate Members may hold appointive offices within SERA, but do not have voting privileges.

## Repeater Journal Mailing

The Repeater Journal is scheduled to be mailed Bulk Rate during the first week of the cover date month. Delivery usually takes one to two weeks. Notify the membership director at [membership@sera.org](mailto:membership@sera.org), if you have not received your copy by the 1st of the following month. The Repeater Journal is not forwarded to new addresses. If you move, send your new address to the membership dept!

# President's Desk

## President's Message

Hello Members of the SERA,

The SERA Board of Directors held their semi-annual meeting the week-end of June 13, 14, 15 in Pigeon Forge, Tennessee. We had a very good attendance and took care of a lot of business. We had some new staff members present. We introduced ourselves to them and welcomed them into our Association. They were Frank Howell our new Mississippi Vice Director. He will be helping Harold Bullard with repeater coordination work in Mississippi. Also appointed in Mississippi was Anthony Allen who will be an Assistant Director. Harold has done a great job and been real busy since he took over the State in January. Thanks Harold for all the hard work in the task of cleaning up the database. Buddy Sohl is the new Repeater Journal Correspondent in Kentucky. For some time we have needed additional personnel in West Virginia. Richard Dillon, West Virginia Director has indicated to us that he wishes to retire soon. The Executive Committee talked it over and decided to recommend to the Board for their approval Glen Sage as the West Virginia Vice Director. Although Glen lives in Virginia, he formally lived in West Virginia and was agreeable to take the position with the knowledge of the possibility of Richard's retirement. With elections two years away, Glen can recommend his staff to the Executive Committee and under our amended bylaws, we can appoint his staff whether they live in West Virginia or not. Hopefully, West Virginia will receive the attention needed to resolve any problems or coordinations. I believe we will see a big difference in a short time. I also want to thank Mike Farris for his untiring efforts in assisting with coordinations in West Virginia and North Carolina plus doing his own as Vice Director in Virginia. The man never sleeps!

Change was in the air on Saturday. Jim Cantrell, SC Vice Director decided to retire as Vice Director after 12 years of service in that position. Our thanks go out to Jim who lived through almost impossible odds when he had liver failure (non-alcoholic) and ultimately a liver and kidney transplant. He went from bed ridden back to his normal self and able to attend meeting again. Jim will continue with the SERA as Asst. Director for John Crockett and serving as Repeater Journal Correspondent. With Jim's retirement a position of SC Vice Director was open. John Crockett SC Director nominated Matthew Littleton as his Vice Director. He was elected by Board Members present. Matthew is a Captain with Anderson County Sheriff's Office. Welcome aboard Matthew, I look forward to seeing you at the next meeting.

Of course we had an agenda to cover with State reports. At the end of the day we had two repeater owners from West Virginia who had some questions for the board. Although one was taken care of by the Executive Appointment and Board Approval of a new West Virginia Vice Director, we listened and took their comments for information.

I want to thank my Executive Committee Danny Hampton, Dr. Ron Johnson, John Davis, and John Crockett for making good decisions for the continued success of our organization. And last but not least I again thank Shaun Bennett and John Crockett for the hard work they do with the UCS (Universal Coordination System). Nobody in the Country has what we have.

The Board of Directors and their families enjoyed a nice meal Saturday night and we departed Sunday Morning for our respective homes. Our next Board of Directors meeting will be held January 2,3,4, 2015 in Pigeon Forge, Tennessee.

**Roger W. Gregory W4RWG**

August 2014

## Permanent Agency Emergency Ham Stations By Glen Sage, W4GHS

Following 9/11 and Hurricane Katrina, communication needs have gotten a higher priority with both government and non-government agencies. Many government, non-government, and non-profit agencies have seen the value of Amateur Radio and have included funding to support the efforts of hams that support their agency. In other incidents, hams have been totally on their own in the purchase of equipment to support their response in providing communications to local agencies.

The hams in my county and in some neighboring counties have received considerable help from government and other agencies in the purchase of equipment to install in every public service agency within our counties. These have included stations for every fire, rescue, search and rescue, E-911 system, the local Red Cross and hospitals. This has been fortunate in some ways but those emergency communications groups that purchased their own equipment through their own hard work often feel a greater sense of ownership in their systems. When these latter groups are called up to leave their home area and serve other jurisdictions, they may have greater latitude with non-agency owned equipment when responding to these requests.

When supporting agencies have provided no financial or equipment support, small local emcomm groups may have to make hard choices as to what to install at critical locations. For example, if I had to do a permanent installation at a location with between a 100 and 200 dollar budget, I would select an antenna and feed-line as the items to install. When an emergency arises, this is the equipment that would require the greatest time to install. Trying to run coax and mounting an effective antenna system to most commercial buildings can require considerable time and effort. This can be compounded by adverse weather conditions. Once the antenna and feed-line are in place, bringing your own rig and power supply in and making necessary connections is a simple task that requires little time.

I prefer a full power station (40-50 watts) for VHF/UHF to be used as an emergency base station. It is not ideal but there may be times that hams with nothing more than an HT are needed to man a station location. These hams may still setup a station with an adapter that allows them to connect their HT to an effective antenna system. If these same hams tried to operate with a rubber duck,

their station might be very ineffective. Having a feed-line and antenna in place can turn them into a well functioning station when operating into local repeaters.

If stations are not pre-installed at critical locations, effective work-arounds can be used. When emergency stations must be installed in a commercial building that is built like a "Faraday cage" and hundreds of feet of coax may be required to get to an outside antenna, other methods should be considered. Feed-line losses with this length of coax would be great on VHF/UHF and could create problems reaching supporting repeaters. One way for offsetting this challenge is the use of cross-band repeat. When this mode is used it is important that supporting repeaters have a short squelch tail or no squelch tail at all.

I have witnessed two situations where pre-installed antennas or structures have saved the day. In 1979 I was the EC in Raleigh County WV and we were invited to participate in a Simulated Disaster Exercise that involved a simulated train wreck at the bottom of the New River Gorge. This exercise simulated 85 fatalities and many more injuries. Our ARES group knew that 5 hospitals were going to be used in the exercise. This was in an era of few repeaters being located in the area so effective antennas systems were going to be needed in the hospitals. Our ARES group made these installations prior to the exercise and it turned out that we had the only effective communications from the simulated disaster site and the hospitals. In real life we would not have the time to install these antennas. So, pre-installation allowed us to come off as heroes. This created a situation where antennas were permanently installed at the hospitals and a complete Drake station was setup at the county EOC.

The second situation was during Hurricane Katrina in Hattiesburg MS, at the Red Cross Chapter. They had removed a former radio station from the chapterhouse but left a 60 foot tower with a VHF Station Master antenna on the top of the tower and a pulley and rope attached to a standoff near the top of the tower. We quickly attached our two meter rig to the Station Master feed-line and used the rope and pulley to hoist our HF antenna into place at 50 feet. We were on the air in minutes on both VHF and HF due to the tower and coax being in place.

"Go Kits" are a vital part of our response but these permanent stations or parts of permanent stations can be a real time saver in having a quick operation station.

Until next quarter, "Stay Prepared".

# South Carolina News

## Jim Cantrell, WJ4C

1) On Oct 1st 2013 Meeting Nite, Mr. Billy Irwin (K9OH) the Greenville Spartanburg Regional Skywarn Coordinator. Came did a Program and discussed the proper procedure in doing the Skywarn Net.

2) On Feb 4th 2014 Mr. Cliff Mcleod (WB4DPP) did a Presentation and discussion on what is and how (SWR) Standing Wave Ratio works.

3) Mr. Wayne Vasilenko (K4VAS) does various trianing classes on the PCECG Nets which takes place on the 442.400 Repeater or either our Echolink Node # 4031 WX4PG. This takes place each Tuesday Nite at 8pm (Except the First Tuesday Nite which is our Meeting Nite). For anyone that is a Amateur (Ham) Radio Operator, or wants to learn how to become a Ham.

The PCECG Meets the First Tuesday Nite of each Month at 7pm @ the Emergency Operations Center which is located @ 1509 Walhala (183) Hwy West of Pickens, S.C. We invite each and everyone that is interested.

The (PCECG) can be contacted by our E-Mail Address ([pccg@wx4pg.org](mailto:pccg@wx4pg.org)) if any questions.

We look forward in your visit!

**Anderson Radio Club**

TOM WEIR (KK4CEW) April 2014

[www.andersonradioclub.com](http://www.andersonradioclub.com)

John described his life-saving flying missions for doctors and missionaries and the dangers of flying and living in the Republic of Botswana in the Kalahari Desert (no power, no running water) of Southern Africa for seven months. His main long-distance communication over the large areas of the desert was amateur radio.

While in high school, Tom listened to shortwave radio using a Hallicrafters S-40B receiver with a 100' long-wire antenna listening to hams around the world and collected dozens of QSL cards. Tom grew up in St. Petersburg Florida before serving in the US Navy as an Electronics Technician on board the destroyer Eugene A. Greene. Tom's ship visited many foreign ports-of-call and was a down-range recovery ship for the Gemini 2 Space Shot. Traveling via the Panama and Suez Canals, the ship also served off the coast of Vietnam where its guns were fired during wartime for the first time.

Once leaving the military, Tom worked in the aviation industry as an Avionics technician repairing aircraft communications equipment. He also worked as a Technical Specialist in Data Communications for a computer hardware company. His last employer was Square D/Schneider Electric for 34 years as an Electrical Engineer retiring as Senior Quotation Specialist.

Tom has now begun his retirement career as Tom's Handyman Service specializing in electrical work and other various jobs. He's also busy with his wife, Linda in wedding photography and he works part-time as an assistant for the

Duckett-Robinson Funeral Home, Central. [Way to go Tom, from weddings to death!] Since 2010, Tom has been with the Southern Baptist Disaster Relief of SC and his most recent SC DR relief effort was with the SC DR Communications unit in Hammonton NJ when Hurricane Sandy hit in 2010. Tom and Linda live in Seneca and they have a daughter living in Seneca with two children and a son living in California with two children. Tom working contacts at ARC Field Day in the Disaster Relief Trailer.

Tom has been a member of the Anderson Radio Club since 2011 holding a General license and has been involved with the weekly TCS (Tin Can Sailors) and NARC (Navy Amateur Radio Club) nets as well as the ARC net. In fact, back in 2011, Tom reconnected with one of his former Navy shipmates during the ARRL Rookie Roundup.

Congratulations

Will Littleton!

Ten-year old Will passed his Technician Exam last week. He is the son of Matthew Littleton (KN4SWB) and grandson of VP James Littleton (WB4LZT).

Keep up the good work, Will.

Behind the Call Signs

for the Anderson

2-Meter Net

James Smith

(KG4MUL)

Every evening, James checks in to ARC's nightly net as well as other radio club's nets, including 7240 Khz and the 3915 Khz single-side band net. When James isn't working the radio, he's outside taking care of four bee hives on his property. Earlier this year, he had 21 bee hives but many of the bees didn't survive. Before he became a ham in 2001, James spent time on the air as a CB'er. James retired after 37 years as an Air Jet Loom Textile Technician.

We look forward in your visit.

Charleston Amateur Radio Society (CARS) with help from The Trident Amateur Radio Club, (TARC) provided comms and time calling assistance for the Charleston Marathon on January 18. Thirty three Hams participated in the almost day long event with

c5000 runners on the 26.2 mile race and a 10K race.

Saturday January 25, 2014 was Winter Field Day. TARC hosted the event in Goose Creek. Temperature was 17\* at six o'clock in the morning.

Saturday February 1st, was the Annual Charleston Hamfest and ARRL State Convention. The events were held again at the Armory Park in North Charleston. Weather was chilly and drizzly but the inside venue with heat was great. Good crowds and good BBQ and Hot Dogs. Thanks to All that attended. We can't do it without you.

A special Tech class was given on January 23-24 and exams on 24th. 15 new Hams. Another test was given at the Hamfest on Feb. 1st, with 13 more hams including 2 Generals and one Extra. CARS regular testing is on 2nd Saturday mornings of every EVEN Month, 9:00AM at Trident Hospital in N. Charleston.

The Quarter Century Wireless Assoc, (QCWA), Palmetto State Chapter #89 held their 1st meeting of the new year on Saturday Feb. 22nd at Ryan's Rest. In Charleston.

Berkeley, Charleston, Colleton, and Dorchester Counties endured power Failures, blocked roads and bridges, and ICE when the Ice Storm came calling. Many power failures lasted a week or more. The huge Ravenel Bridge over the Cooper River was closed twice. The second time due to chunks of ice, some as large as 1' X 3' falling from overhead. Two cars and a truck were damaged, one resulting in injuries.

## Board Meeting Highlights

January 4, 2014

Pigeon Forge, Tennessee

Dr. Ron Johnson WB4GWA, Secretary

### Attendees:

Norm Schklar, Ron Johnson, John Davis, Roger Gregory, Shaun Bennett, Tim Osborne, Bill Call, Mike Bishop, Jim Campbell, Glen Sage, Jim Cantrell, Dwight Hayes, Danny Hampton, Mike Fariss, John Crockett, Bob Lukaszewski

President Gregory called the meeting to order at 1:10 p.m.

Minutes approved and accepted from the 2013 Summer meeting.

### Executive Staff Reports:

John Crockett reported 1406 emails were sent out to registered trustees. Over 1300 have been re-coordinated as a result of the email. About 100 are waiting to be done.

Mike Fariss reported the transfer of K4MOB. SERA is trying to get the callsign back from the FCC. Apparently, the initial request for it was denied.

John Davis gave the treasurer's report. The registered agent was changed to Danny Hampton.

Roger recognized the new Editor--- Norm Schklar The rest of the board introduced itself to Norm.

Norm gave a report on the beginnings of his task as Editor. He needs to make deadlines the first of the month in the month that the Journal is coming out. State reports need to be generated from the state. Each state director should make sure that reports are being turned in.

Mike Fariss gave the FCC Liaison report. He reported on one complaint in South Carolina. One complaint in TN. One issue in N.C. that was resolved.

Mike Fariss gave a membership report. 2012 SERA had 1216 members..... 2013 SERA had 1333..... So far in 2014 SERA has over 1400 members.

Danny reported on the SERA help line. He has helped people work through the UCS. Harold Bullard was appointed Mississippi Director.

### UCS update—John Crockett

When the email blast was sent out, we turned the corner in terms of making UCS work. The old server was very slow. The server was changed and we are the only customer on it. We are just shy of 1400 repeaters being renewed for 2014.

A final mailing will go out to folks who have no email. Repeater will be removed from the Journal and finally decoordinated if we do not hear from owners.

### State Reports

#### Mississippi Report

Coordinated 1-6 meters

1-2 meters

1 1.2g meters

5-440 meters ULS updates not counted at this time.

#### Virginia Report for 2013

Based on information obtained from the UCS, the Virginia Coordinators have performed the following during 2013.

209 Coordinations or Re-Coordinations

*Continued on 8*

## 9 De-coordinations

## 255 Administrative Deletions

Based on information supplied to ARRL, Virginia has approximately the following number of repeaters by band.

220 Mhz 1 440 Mhz 8

NOPC's answered 24 from SERA member states

NOPC's answered 4 from Alabama

TN has no Duplicate records TN has no invalid Trustees

**Kentucky East report.**

Coordinated one new 440 Hub repeater which is a 440MHz Hub repeater.

Two additional NOPC's that are awaiting responses from

Adjacent states. Both of these are 2 meter repeaters - one new, one a move of several miles from its previous location.

Other efforts have taken more time than the above, but I have not kept up with the numbers: helping repeater trustees/owners with UCS, entering data updates and recertifications for those trustees/owners who cannot negotiate UCS, reviewing & approving recertification requests, and general information concerning repeater coordination via phone calls or e-mails.

Answered approx. 30 NOPCs. (Tim)

Coordinated one new 2 meter repeater and 2 new 440 repeaters. Fielding numerous calls and emails about the UCS and the Recert. Recertifications 127

**Georgia Report**

- Uncoordinated: 8 repeaters, mostly old 220s and 440s.....
- NOPCs answered: 9
- New Coordinations: 6, One moved and re-assigned; 2 trustee changes; two 440s and a 220.
- Administrative Deletions: 17 redundant records
- Re-Certifications: 223

- Resolved a coordination in Mississippi...
- Helped four guys walk through UCS and filled out several records to make them more complete.
- Sent out literally dozens of emails to guys trying to get club trustee changes made where needed. Only two have responded and were fixed.
- Sent out about 10 emails to guys who simply checked "re-certify" yet made no updates to their record.... Asked them to fix and re-submit. One followed up and did it.

**Georgia digital activity (John)**

1- MotoTRBO new coordination

3- D-STAR new coordination in Georgia

3- D-STAR new coordination in Mississippi

3- Change Trustee

23- recertification

**Bulk email activity**

July, 2013 – Sent 75 email requests for new Georgia Trustee registrations

December, 2013 – Sent 1406 email notifications for annual repeater certification

**South Carolina**

Coordinations 4 UHF - 3 Moto-Turbo, 1 Analog

2014 Renewals 115 additional 23 recertified but yet to be renewed

SC Total Repeaters 241

1-10Mtr 8-52

118-144 13-220

97- 440 2- 902

2-1240

**UCS**

Sera 2014 Renewals 1245, additional 90 recertified but yet to be renewed, and 30 updated but yet to be renewed

SERA 2014 January total of 3047 repeaters in the data base.

Meeting adjourned 9:15. Danny Hampton made the motion.....

Next meeting: June 13-14, 2014

**Follow-up Actions by Email****January 8**

Motion by John Davis to revise the digital band plan, seconded by Mike Fariss and sent to staff for 7 day consideration. A revision was sent out by John Davis. Shown below:

Revision to SERA Coordination Policy for Digital Repeaters

Due to the wide variety of formats, modes and bandwidths for digital repeaters, coordination of digital and mixed mode (digital and analog operating on same frequency pair) presents unique challenges for repeater coordination. As new digital and mixed modes are developed, chan-

Continued on 9

ges in coordination guidelines should be adopted to ensure best use of spectrum and minimize impact to existing repeater operators. In all cases, standard co-channel and adjacent channel parameters apply.

### New Repeater Coordination Requests

- D-STAR and NXDN operating in digital only mode may be coordinated in the 2m band on one of the 8 pairs designated for narrowband digital repeaters (144.920 – 145.08 outputs) or one of the 10 KHz splinter pairs in the 144-145 sub-band (i.e. 145.12, 145.140, etc.). In the 70cm band, coordination on one of the 18 pairs between 440.5125 and 440.7250 or one of the 12.5 KHz splinter pairs between the standard 25 KHz pairs. If none of these pairs are available, one of the standard repeater pairs in the 2m or 70cm band may be used, but should only be used as a final choice to avoid mixing digital and analog repeaters.

- DMR (MotoTRBO), P25 (APCO25) operating in either digital only or mixed mode coordination requests should first be attempted in the 70 cm band using one of the 12.5 KHz splinter pairs. If this cannot be accommodated on a 70cm pair, one of the standard 2m or 70cm repeater pairs may be used as a final choice.

- System Fusion repeaters operating in digital only mode coordination requests should first be attempted in the 70 cm band using one of the 12.5 KHz splinter pairs. If this cannot be accommodated on a 70cm pair, one of the standard 2m or 70cm repeater pairs may be used as a final choice.

- NXDN and System Fusion repeaters operating in mixed mode may be coordinated on standard repeater pairs in either 2m or 70cm bands.

### Change from Existing FM to Digital Repeater Coordination Requests

- If an existing FM repeater owner operating on a standard repeater pair wishes to change to a digital repeater operating in digital only mode, a frequency change to one of the digital only pairs above should be suggested according to the digital mode to be used. If none of pairs are available for the specific digital only mode, the repeater may remain on the standard pair in the 2m or 70cm band.

- If an existing FM repeater owner operating on a standard repeater pair wishes to change to a digital repeater operating in mixed digital and analog mode, it should remain on the standard repeater pair.

- If an existing FM repeater was coordinated with a waiver due to short spacing or other conditions and is converted to a digital mode, a new waiver must be obtained to include notification of the conversion to digital.

### Proposed Database Mode/Descriptions

•FM	FM (16K0F3E)	Standard 25 KHz FM
•NFM	Narrowband FM (11K2F3E)	Narrowband 12.5 KHz FM
•P25	APCO25 Digital Only	12.5 KHz, 2 timeslot TDMA
•P25-M	APCO25 Mixed Mode	12.5 KHz TDMA or NFM
•DMR	DMR Digital Only (7K60FXD)	12.5 KHz, 2 timeslot TDMA

•DMR-M	DMR Mixed Mode	12.5 KHz TDMA or NFM
•D-STAR	D-STAR (6K00F7W)	6.25 KHz digital
•NXDN	NXDN Digital Only	6.25 KHz digital
•NXDN-M	NXDN Mixed Mode	6.25 KHz digital or FM
•SF-D	System Fusion Digital Only	12.5 KHz FDMA digital
•SF-M	System Fusion Mixed Mode	12.5 KHz FDMA digital or FM

Motion was carried after the 7 day consideration by unanimous vote.

During February, the Executive committee met online for a discussion on scanning the old journals. The committee decided to move ahead with each member of the committee voting to proceed with the scanning of the Journals.

### Editor's Note

This issue has both the possible decoordination listing and the Board's January meeting highlights. So I ran out of space. That means some articles didn't make it to print. Much of what didn't make it can be used in the next issue. I appreciate the correspondents going to the trouble of gathering information for the JOURNAL. If you would like to use info that didn't get in print this time, I'll be glad to carry it over to next issue.

Meantime, there has got to be a photographer out there that would love to get a few shots of repeater sites in your area. Folks are probably going to get tired of my local photos. So send me something with a short explanation of who, what and where along with your photos.

For those sending articles for the JOURNAL, please do not send photos in your article. A note in the article for where the photos goes and an attached photo will be appreciated. You call sign, and state in the document name and photo file name will help. Something like "wa4zxv\_GA\_3.jpg"

My apologies for my many errors and I appreciate hearing about them. I know I'll get better at this.

73, Norm, WA4ZXV, EDITOR@sera.org

<http://www.jars.net>

Hello from Kentucky. A few items of note this quarter from the Bullitt Amateur Radio Society in Shepherdsville. The club has been chosen as a test group for the Yaesu Fusion repeater. This is Yaesu's attempt to address the analog/digital format compatibility issue. To date several periods of digital activity interspersed with analog traffic have occurred and comments have generally been favorable with reception reports giving the edge to digital about equal to those giving the reception edge to analog. If you have comments to add please email them to [barsfusiontest@gmail.com](mailto:barsfusiontest@gmail.com).

*Dave, N4FND works on the KY4KY 70 repeater*

Also the club reports that the 443.700 repeater has been separated from the 146.70 repeater for the duration of this test for Yaesu.

Bill, WA4LAV, in Lexington has offered a technical workshop monthly for several years now. He covers many different topics throughout the year and, I'm certain, would like to see new, energetic faces along with the regulars. If you're looking for some enlightenment into some technical topics contact Bill at [wlfuqu00@uky.edu](mailto:wlfuqu00@uky.edu) or 859-338-7805.

ARRL Scholarships go to Kentucky students. Matthew D. Preiser, KK4NSS, of Cressent Springs, was awarded a \$2,000 Dayton Amateur Radio Association scholarship. Matthew is a recent graduate of Dixie Heights High School in Crescent Hills, Ky. He was a student of Jim Hicks, WB4CTX, and earned his ham ticket as part of the Radio Technology class Jim teaches at Dixie Heights.

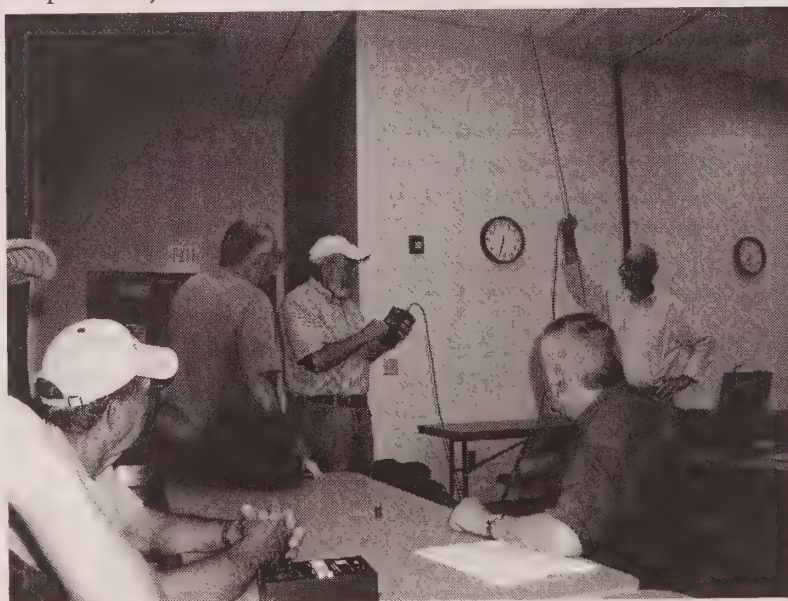

Elijah Brooks, KJ4FZX, of Cocks Creek, was awarded the \$2,000 Richard W. Bendicksen, N7ZL, Memorial Scholarship. Elijah is an Assistant Section Manager and travels to most Kentucky hamfests with his dad, KY SM Jim Brooks. Elijah is a graduate of Nelson County High School, and was a technology student of Charlie Cantrill, KI4RDT at the Nelson County Area Technical Center in Bardtown.

Jim, KY4Z, reports the number of Kentucky hamfests continues

to grow, and he enjoyed visiting the Letcher County ARC's first hamfest in April. There was a good turnout for the first edition, and lots of gear changed hands. Two people took and passed the Technician License Exam, and one person tested and passed all three levels of license exams. The Fest was such a success that the club is looking for a bigger building for next year, although they were sure the Masonic Lodge, site of this year's hamfest was big enough. Another positive development is that for the first time in more than eight years, the Greater Louisville Hamfest has been sanctioned as Kentucky State ARRL Convention. See you in September! The Hazard hamfest will be Saturday, October 25. For a list of additional upcoming hamfests, check out the ARRL hamfest calendar on the ARRL website.

**KY ARES CONFERENCE.** Mark your calendar now for the Kentucky ARES Conference coming Saturday, Nov. 8, 2014. The conference is set for the Nelson County Civic Center, 321 S. Third St. in Bardstown. Check the conference website to register to attend and check for updates, [www.KYARESCONFERENCE.com](http://www.KYARESCONFERENCE.com).

KMARC, the Perry Co. Club, which has members from around the area, has a Ham Breakfast every Friday at "Your Place," a little home-owned restaurant in Happy, KY., in Perry Co. The food is great and priced right. We usually have from 6 to 16 hams in attendance from 3 or 4 counties. It's great for swapping ideas, lies, pieces of gear, and other things hams do when they get together. If you're in the area, drop in and join the fun.

*Bob Spurlock, WB4IEA demonstrates the antenna analyzer*

At the May meeting of the Kentucky Mountains ARC in Hazard, the club discussed using the MFJ Antenna Analyzer. Most every ham has one of these gadgets. Bob Spurlock, WB4IEA, gave the program, explaining how the gadget works and how it's different

# Nostalgic Wavelengths

## NOSTALGIC WAVELENGTHS

### Dick Tracy's Wrist Radio—and A Small HT I Bought at A Hamfest Many Years Ago

As I waited for my flight back to Knoxville, after attending a past Huntsville Hamfest, I gazed out the window of the terminal and looked at the puffy clouds of summer covering the blue sky in the distance. Fall, I thought, is just around the corner—but that can wait for awhile. I pulled the subminiature Yaesu VX-1R HT from my pocket, purchased at the hamfest, and it really hit me as to how small this wonder of electronics is. In this small package, the same size as my speaker-microphone for my ICOM IC-V21AT, features are packaged to allow the unit to function as a dual band HT for 2 meters and 70cm, in addition to covering the spectrum from 76MHz to 999MHz as a receiver. On the hambands, the unit can operate at 1/2 watt on high power, or 50 milliwatts if needed to conserve power. An external power supply will allow the unit to run a full one watt. The unit can be programmed with PL frequencies, as required, and the normal offsets for each band are already programmed. DTMF codes can even be entered for autopatch. Bands are available for receiving FM broadcast and VHF-UHF television (audio only for the TV, of course). Amazingly, it also covers the AM broadcast band (.5MHz to 1.7MHz). With this unit, I relaxed and listened to aircraft-airport communication and learned the ceiling was 2000 feet, along with the barometric pressure and other pertinent weather conditions that pilots follow.

Prior to boarding the aircraft, I thought back to the 1950s when Dick Tracy (a popular comic strip character) had his wrist radio for communicating with his associates in fighting crime. As I recall, his electronic communicator had a small antenna attached to his arm. His transceiver was about the size of the Yaesu unit I had just purchased. I remember seeing the cover of a popular magazine back then showing a "Dick Tracy" wrist radio "you could build" using a new development known as a transistor. The simple radio, an AM

receiver (it did not transmit), was depicted on a person's arm with a long dangling antenna. This was my first transistor project. It was really just a simple 1N34 diode detector receiver, followed by a single-stage audio amplifier using a GE 2N107 germanium transistor. A loop stick antenna, capacitor, and a few other components were used to complete the radio. The whole project was built in a transparent case. It certainly did not in anyway measure up to what the famous crime fighter's "transceiver" could do. Amazing as it appeared in the 1950s the unit Dick Tracy wore was, in reality, very limited in what it could do compared to the Yaesu in 1997. Certainly, his unit did not have all the features of the Yaesu HT, with the wide frequency coverage, using exotic electronic digital components such as microprocessors and other marvels of silicon and micro construction technology. It seemed like science fiction back then, and it was. It is truly amazing that technology has moved this far and this fast. As with many conceptions of science fiction, time erases the "fiction" part and the reality of new technology soon seems common place. I wonder; how soon will Dick Tracy's wrist two-way TV communicator that he later wore become reality? With advances in compressed video technology in the last few years, that may be a possibility sooner than we think!

The Yaesu VR-1R HT was popular several years ago as a small HT for hams. Notice its size compared to a ICOM HM-54 P-T microphone.

LET'S TAKE A LOOK ...

# TECH-SPECS

Mo Kittle, AD8T  
108 Hickory Dr.  
Elkins, WV 26241  
ad8t@sera.org

Happy summer, readers. By the time you see this, we in WV will be much closer to the next snow than we are from the last, but time waits for no man. Ham radio, too, marches on. WSJT, JT-##, PSK31, Olivia, and many other digital modes, and digital voice, continue to grow. SDRs continue to come on the market. I read an interesting thread on QRZ as to what is the definition of an SDR. Computer-control does not mean it's an SDR. One poster said the Baofeng HTs are SDR. I question that. For sure they are partially SDR but I seriously doubt they are fully SDR.

## HOT TOPIC

...and I don't mean summer, but the Chinese HTs which seem to be taking the VHF/UHF market by storm. I finally broke over after resisting for some months—the last battery finally died for my old but perfect Vertex VX-150. I gave it away and got a Baofeng dual-band (UV-5RE+), spare battery, case, speaker mic, and longer antenna, all for less than the cost of 2 batteries for the Vertex. I am not of the belief that the quality is as good as the Vertex (Yaesu) or KW/Icom, but now we are coming upon the era of disposable radios. My Yaesu FT11R is around 15 years old, and I don't expect this Baofeng to last nearly that long!

The Chinese HT programming via computer definitely has some glitches, but I've learned how to work around that, and all is well. Tricky, and as many of you know, the original "documentation" is worthless. The internet comes to the rescue again. I know there are many of you who are using them for both Amateur and Commercial. I'm still amazed at the economics—how can they make the device and ship it from China for \$35? Really goes to show how cheap labor is over there.

Quite possibly if I were in an urban/heavy RF environment, I would be able to observe the RF shortcomings of these HTs. I wonder how much of the price of a Yaesu/KW/Icom unit represents a reasonable profit, how much goes toward the development of new products, how much is just charging what the market will bear, etc. Perhaps we are shooting ourselves in the foot here. Time will tell, as to how the big radio manufacturers respond to the Chinese products. It has been said that some of the Big 3 products are already made in PRC. We know that some top-brand electronics are Chinese-made--- some Apple products, for instance.

## NEW HAMS

A class and exams were recently held in our area. A number of new licensees resulted, which is not unusual. What seems to be different is, a bunch of them are now active, enthused, and on the air. Perhaps this is a fluke, but I am sure happy to see some new and younger hams on the air and fired up. The youngest I've met in person and on air

is 18; ages go up from there. The first and best thing we can do is smile and be welcoming. After that, if you can offer additional help, even better. Hand them a card with your call, name, email, and phone number on it...that is, if you really want to help. Maybe they can "find" you without it, but if you really mean to be available, make yourself easy to contact.

## RANDOM

Another [small] boatanchor has found me—a National SW-54 receiver. I definitely wasn't looking for any; it was given to me. It should be easy to rehab, as it is a 5-tube in answer to the Hallicrafters S-38. I got the cap kit, one tube, and a power cord for it; now to find the time to clean it up, repair, and align it. If it turns out looking half decent, I'll post a photo next time. Outdoor activities are taking priority now!

Before the snow flies, I need to order some low-loss coax, clean up the used 6 meter Ringo I bought used on a whim, and get that up somewhere. I don't expect to get far on the Ringo, but it should hit the local repeaters. The HF rig I got in 2012 has 6 on it, and I've never had that band in my shack.

I just heard of a local ham who ordered a Chinese HT from Amazon, received it, and then later ordered some unrelated stuff. They sent him a second HT. That's about the only way to beat \$35—free. I also know of another ham who got a free watch by a similar screw-up. He tried to return it—they refused to acknowledge any mistake.

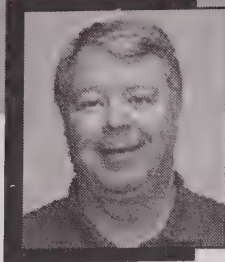

Sometimes I think the whole world has gone nuts: I bought a reman AC compressor weighing 38 lbs. which came from New England via UPS. The core charge is \$40. The USPS which I am sure is the cheapest route, said it will cost \$45-50 to mail it back. Now why would I go in the hole to return it? BTW I tried and tried to use the UPS web site to calculate shipping, and I kept getting a message that the destination address was not valid—and this is a large company that is exclusively mail-order. When I called them on the phone they said, oh yes, our address often comes up invalid on UPS. They don't know why. Oh, and the shipping cost is assuming my time & effort in lugging it to the shipping point are free...they are not. Will I lug it to town and ship it for \$45-50, and be credited \$40? Sheesh! I think not. Maybe my neighbor can use another anchor for his boat...a real anchor, not the radio kind!

## THE MOBILE RIG OF THE FUTURE

I'm going to be in the Savannah area this summer, so I hope I will be able to raise some Georgia ops while there. I already have the Savannah repeaters programmed in one radio. With CTCSS having become a necessary fact of life on most repeaters, it is hardly

*Continued on 14*

Reporting From

# Tennessee

Bob Gault, KD4NEC  
221 Cedarwood Trail  
Cleveland, TN 37312  
kd4nec@sera.org

An abbreviated Tennessee column.

At the time this article is being prepared news had spread that the Ten Tec hamfest will not be held this year due to the companies move to a new location. Most people who regularly attend the event and have found it to be among the best hamfest in east Tennessee have heard the news. The announcement posted to Ten Tec's website indicates they plan to hold a 2015 hamfest.

Derek Wooley KD5UBL, elevated to District 7 ARES Emergency Coordinator, had his former position filled by the appointment of John Triplett KJ4VD as EC for Bradley County. The Emergency Services net, incorporating both ARES and the Auxiliary Communications Service, is heard on Monday night's at 8 p.m. (Eastern Time) on 146.925 Mhz and on 147.375 Mhz, (wide coverage) and on Echo Link.

The McMinn County Amateur Radio Club had a busy June with activities on three weekends, culminating with Field Day. The event was held in conjunction with the McMinn County Living Heritage Museum, observing Amateur Radio Month. Club members displayed vintage equipment at the museum. Information was included of the importance of amateur radio in the community and a demonstration of their equipment by the club.

The Knoxville club recently completed another successful hamfest. There are still a number of events across the state coming up including Chattanooga in October.

The Oak Ridge Amateur Radio Club has information in their most recent newsletter posted online to their website about completion of their scout merit badge course. The article, prepared by Bill Mills KA4RPN, says that fifteen scouts participated. Topics included basic operating procedures, propagation, Q-signals, the phonetic alphabet, and some basic Morse code. Club members involved in the class were Geron Brown K4BBF, Doug Campbell N1CWR, Gould Smith WA4SXM, and Kay Kasemir AI4IC. Plans are underway for a Technician licensing course this fall. Some scouts are among those indicating interest in a class.

Till the next issue of the Journal, 73's...

*Mo Continued from 13*

practical to use them while en route anymore. I know some rigs will read the tone, and I have that repeater map book, and SERA Journal, but you can't fool with that stuff while driving. If you stop every 20 miles to program new repeaters, you'll never get there! If you ran the same route regularly, you could program the repeaters and be good to go.

Certainly if one wanted to badly enough, one could get out the references—SERA Journal etc.—and program in all the repeaters along the route; or some of them. On a long trip, that would be a prohibitive number: You can't tell by looking at a listing which repeaters are active, within range of your route, and "friendly". And when you program them, you would need to enter an alphanumeric designator for each one in order to know where it was—frequency won't do; that wouldn't mean anything as you are driving along. Bottom line—not a reasonable proposition. I used to enjoy .52 simplex and a few repeaters when traveling, but those days are over.

I don't know if I will live to see it, but I foresee a day when a mobile rig will be able to know where it is constantly, and automatically program all the repeaters in a specified radius, constantly updating itself. The Uniden Home Patrol scanner is an example of this technology in its infancy; once you enter the zip code, it will load the local frequencies into memories for you. Some VHF/UHF rigs already have GPS. We have the databases; the necessary technology has existed for some time. All that is needed is to integrate it all within a radio. The only issue is how the rig would acquire the repeater database. It could be done a number of ways. One method would be for the ham to download a repeater database onto a flash drive and plug that into the radio, which would upload it. It would be up to the user to keep the database as current as he/she wished. Where this database would come from, and in the correct format, and who would sponsor it (or if it would be subscription-based), is more of an economic and turf issue than a technical one. Other more gee-whiz methods are technically possible, but maybe not realistic or economic at this time—such as the rig having WiFi and updating itself automatically at preset intervals anytime it can get a signal. Now, how much more would you pay if your mobile rig could do this?

## Coordination Notice

John Crockett, W3KH,  
SERA Vice President

### Don't Lose Your Repeater Coordination

There are two myths in coordinating repeaters.

(1) "My repeater has been on the air since 1982 with no changes. I don't have to do anything else."

(2) "I'm coordinated for life...even if my repeater is off the air or I move it to a new location. It's my frequency."

Unfortunately, neither of these statements are true and failure to keep your repeater information up to date can result in loss of your repeater coordination. SERA's Coordination Policy and Guidelines (CP&G) states that **"The trustee of a coordinated repeater shall notify their SERA Frequency Coordinator of a change in his email or physical address change in the SERA UCS. The trustee should also make the changes in the FCC ULS database, in writing, within ten days of any change in their mailing address. Trustees shall notify their Frequency Coordinator in writing by email, within ten days of the date the repeater ceases operation. If a repeater permanently ceases operation or is sold for relocation, the trustee shall notify their Frequency Coordinator in writing, within ten days of the event. Such cessation letter will be construed to mean the trustee is relinquishing the assigned frequency pair. Failure to keep current in the SERA UCS may also be construed as notification that the repeater has ceased operation and the frequencies are available for re-assignment."**

The CP&G also states **"If the repeater owner or trustee of record fails to keep the SERA UCS current for a period of two consecutive years, the SERA shall automatically de-coordinate the frequency pair and list that repeater as uncoordinated in the SERA Database and Repeater Journal. Failure after a period of one year shall mean removal from the annual data provided to the ARRL for its repeater directory."** Communicating with SERA annually lets us know that your repeater is still on the air and operating in accordance with the approved parameters.

In July of 2012, the Southeastern Repeater Association (SERA) took a major step in improving repeater coordination and making it easier for repeater owners to maintain their repeater information. The creation of the Universal Coordination System (UCS), accessible online through your Internet web browser, allows repeater owners to view and update their information at any time. ULS also allows repeater owners to certify each year that their repeater continues in operation and if there are no changes, one click completes the process.

The SERA Board of Directors also addressed the number one complaint of "paper repeaters" or repeaters listed as coordinated and still in operation, but no longer on the

air. With a change in the procedure for de-coordinating repeaters, dozens of repeaters have been de-coordinated making new frequency pairs available.

This summer marks two years since the UCS went online and triggers some key dates in the

coordinating process. In early May of this year, SERA mailed letters to repeater owners and Trustees who have not responded to numerous attempts to contact them to verify their repeater operation to maintain their coordination status. The letters were mailed to the address contained in the FCC ULS database which is an FCC requirement to maintain your Amateur Radio license. If you received one of these letters, it is important that you contact your state's Frequency Coordinator immediately to verify the status of your repeater and update any required information.

Many have responded, but many have not. **Following this article is a list of the repeaters as of June 18, 2014 that are in jeopardy of losing their repeater coordination. If you have not responded and updated your repeater information by September 15, 2014, your repeater is subject to immediate de-coordination and reassignment of the frequency.**

#### ***How do I protect my frequency coordination?***

SERA's Frequency Coordinators work very hard to ensure that each repeater owner can operate in an interference free environment and will assist any amateur or group that desires to put a repeater on the air. However, it is imperative that repeater owners understand their responsibility to maintain their repeater information, update and certify annually and to respond to any request for information. Using the UCS, you can register as a repeater Trustee, apply for a new repeater coordination, maintain information on an existing repeater and view complete information on any of your repeaters.

#### **Using the Universal Coordination System (UCS)**

- The first step is to register online as a Trustee or repeater owner. In your web browser, go to <http://scheart.us/sera/> and click on "Register". Enter your FCC callsign as the username and enter your email ad-

*Continued on 17*

dress. A password will be sent to the email address you supplied. You can change your password later.

- After receiving your password by email, log back into UCS at <http://scheart.us/sera/>. Clicking on "Coordination Tools" will allow you to "Browse Records for yourcallsign" to see any repeaters that you are listed as the Trustee. If you do not see any of your repeaters, it is likely that you are listed as the current Trustee for that repeater. Contact [w3kh@sera.org](mailto:w3kh@sera.org) to check the repeater listing.
- *If you are the Trustee of a club license, you must ensure that you are listed as the Trustee in the FCC Universal Licensing System. If you are not, you must file with the FCC to change the listed Trustee.*
- If your repeater(s) are shown, check the date under Status to see if a date within the current year is shown. If the date is not in the current year, you need to update or recertify your repeater(s). To display the repeater record, click "view".
- Verify ALL of the information for the repeater including contact information and technical parameters (output power, antenna gain, transmission line type and length,

duplexer loss, etc.). If all of the information is complete and requires no changes, select "Recertify that information is current – no changes". Leaving anything blank will show an error and will not record your information.

- If anything needs to be changed, select "Edit Record" at the bottom of the listing to update. All information must be filled in to complete the process. Click "Submit" at the bottom to record your information. Leaving anything blank will show an error and will not record your information.

If you need assistance with updating information or have questions on using the UCS, contact your state Director, Vice-Director or Frequency Coordinator. They will be glad to assist you. Remember, you have responsibilities as a repeater owner or Trustee to maintain your frequency coordination. While the frequency coordination process is voluntary, it provides a process for minimizing interference between repeaters and maximizing the number of repeaters available for the enjoyment of everyone in the bands.

## Repeaters Subject to De-coordination

The following repeaters have not been updated for over two years. According to SERA Coordination Policy and Guidelines (CP&G), failure to certify the operation of a repeater annually will result in de-coordination. If a repeater on this list is not updated with current information by September 15, 2014, it will be de-coordinated and the frequency pair will be available for reassignment. To avoid de-coordination, contact your state Frequency Coordinator for assistance.

## Repeaters Subject to De-coordination

The above listed repeaters have not been updated for over two years. According to SERA Coordination Policy and Guidelines (CP&G), failure to certify the operation of a repeater annually will result in de-coordination. If a repeater on this list is not updated with current information by September 15, 2014, it will be de-coordinated and the frequency pair will be available for reassignment. To avoid de-coordination, contact your state Frequency Coordinator for assistance.

# The Official SERA Repeater Index

The listing of repeaters in this issue represents the OFFICIAL information contained in the SERA Universal Coordination System (UCS) database. ***It is the responsibility of each repeater owner or Trustee to keep this information up to date to maintain coordinated status for your repeater.*** To maintain this information and coordinated status, the repeater owner or Trustee must first register in UCS. If you have not registered, go to <http://www.sera.org> and follow the instructions to register in UCS. Once registered, you may view information on repeaters where you are the owner or Trustee. You may view your repeater records from the link at <http://www.sera.org>. As of this year, paper copies of the Annual Repeater Datasheets will no longer be mailed. Instead, an easier online system to verify your repeater information and certify its operation is available to registered repeater owners and Trustees. ***Prior to January 1, 2014, ALL repeater owners and Trustees must review and certify their repeater records in UCS and certify operation.*** As stated in the SERA Coordination Policies & Guidelines (CP&G), failure to certify repeater information an operation for two consecutive years WILL result in automatic de-coordination. ***If your repeater is listed with “#” sign in the following listing, you have failed to meet the requirements to maintain coordination.*** To return to coordinated status, repeater owners and Trustees must be registered in UCS, review the repeater data and certify operation annually. If you have questions or require assistance, contact your state Director or Vice Director listed at the beginning of the Repeater Journal. They will be glad to assist you and answer any questions.

## Important Copyright Notice

The SERA Repeater Journal is a copyrighted publication of the SouthEastern Repeater Association, Inc. and may not be copied, reproduced or published by any means without the express written permission of the SouthEastern Repeater Association. All rights reserved.

SERA is not responsible for the accuracy of the information contained herein. It is the sole responsibility of the individual repeater owner or Trustee to maintain accurate information. SERA makes every effort to maintain the information as accurate as possible based on the information provided.

Listing of a repeater does not necessarily recognize such repeaters as coordinated. Listing of uncoordinated repeaters is intended to inform our readers of all repeaters known in the areas served by SERA.

Entries with “#” in front of city indicates repeaters added to this index that have not been coordinated through the local SERA state coordinator. Owners may work with their coordinator to get this indicator removed. Repeater that have been coordinated but may not yet be on the air yet are listed with “PROP” in the codes column. Owners should notify SERA when on the air.

Continued from 11

from a through line SWR meter. He used a TV "Rabbit Ear" adjustable dipole antenna to demonstrate how it worked, and how the readings varied. Shown helping him are Mike Chowning, N8TTR, holding the antenna, and Jimmy Hatton, KK4IFF. A short technical program, not too difficult, will turn out a good crowd, usually. Members brought their own gadgets, and used them on some of the mobile antennas on the various vehicles.

The Bullitt ARS held a 'Be Prepared' presentation in May presented by Jim KJ7NT. Jim covered some non-typical ham preparation ideas. We always remember the antennas, extra batteries and connectors but what about something to signal a rescuer with, such as a mirror. Or maybe a 20 foot length of rope to fashion a shelter? The program was so well received Jim has been asked to reproduce the program as a Field Day educational segment. The BARS club is always thinking Field Day points!

*KI4RDG visits with Bob Heil at Dayton*

The Amateur Radio Transmitting Society in Louisville stepped up this year and organized a bus trip to Dayton. Over 20 Louisville area hams jumped at the opportunity. Chris DeMarsh, KI4RDG, reported that the bus pulled out at 6:45 and arrived at the front door of Hara arena at 9:45AM. Chris is the vice president of the ARTS club this year and experienced his first trip to ham mecca. I know he's anxiously awaiting next years trip. Kudos to the club for organizing a successful and cost saving trip for all the Louisville area hams. The club plans on a trip again next year. Follow ARTS on facebook so as not to miss out.

Many thanks to all the Kentucky hams that have provided input for this quarters issue. Photo credits KC4WQ, K4AVX, KI4RDG.

Reporting from

# Virginia

**This Virginia Report is coordinated by the  
K4AMG**

Send us your club's repeater information for the SERA Repeater Journal. Email to [richard.siff@verizon.net](mailto:richard.siff@verizon.net)

**2014 Virginia QSO Party Youth Plaque WINNER:**

**KK4BSM – John Herrick**

**KK4BSM - BIO**

I first developed an interest in radio communications during elementary school. Each morning, I would sit in the front seat of the school bus just to listen to the new radio system. I was originally introduced to Ham Radio in 2006 thanks to Fred, K4LMA, a friend from church. I bought and read "Ham Radio for Dummies" which lead to an interest in scanners,

**New Hams:**

**Chris Wilson (Senior)**

Will be attending Woodrow Wilson and TCC to pursue a career in Auto mechanics and Auto body repair. Chris will be using the electronics knowledge he gained in obtaining his Technician license in his future studies.

**Joshua Lex (Senior)**

Will be attending Old Dominion University. He is on the Great Bridge HS Swim team and will be trying out for the ODU team as well. He is looking forward to enjoying some time using his new technician license.

**Upgrade:**

Eddie - KK4YTT from the CCST passed his GENERAL.

John - W4RMV Passed his EXTRA.

*KK4BSM continued*

NOAA Weather Radio, and FRS Walkies for the next few years. I also watched Randy, K7AGE's videos on YouTube to feed my interest.

Finally in 2011, I decided to study for my license, and passed my Tech and General class exams over Spring Break. I was assigned my call sign "KK4BSM" shortly thereafter. The next summer I upgraded my license to Extra Class. During the past 3 years, I have made over 1000 contacts across 94 countries. My favorite achievement was contacting a station in Canberra, Australia using just 25 watts; less power than the average light bulb!

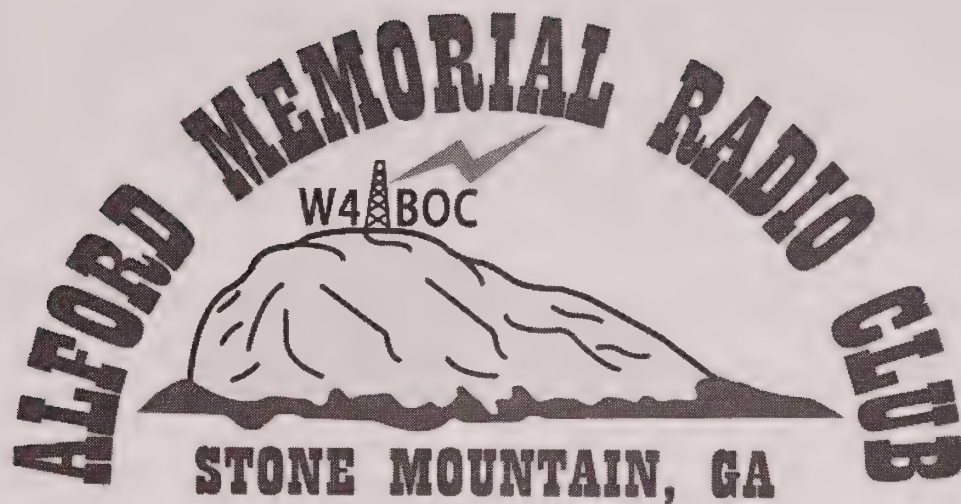

My HF station consists of an Icom-706mkIIG transceiver, an LDG AT-11MP Autotuner, and a ladderline-fed 40 meter dipole at about 40'. On 2 meters, I use a Yaesu FT-2900R to a Diamond X-30A attic antenna. Regarding my future plans, I am graduating from Fluvanna County High School on May 24, and will be studying Meteorology at Virginia Tech this fall. I plan on becoming active in the Virginia Tech Amateur Radio Association and the Skywarn program while enrolled there.

I'd like to thank the K4AMG Memorial Amateur Radio club for sponsoring the Youth Plaque and for everything else they do to promote Amateur Radio.

73

*John KK4BSM*

1/12 Page Vertical 2.25 x 2.5" \$20

Spotlight Page 2.25 x 1.25" (3 issues) \$30

### INVOICING AND AD INSERTION ORDERS

**Dealers:** Quarterly dealer invoices, after insertion, will request information pertaining to future insertions. If no instructions on the *paid* invoice copy are received, the ad will be *repeated* and invoiced the following quarter.

**Hamfests:** Advertising must be ordered each edition for insertion. Payment must

accompany insertion order/advertising copy for Hamfest ads.

### ADVERTISING PAYMENT POLICY

**ADVERTISING INVOICES** are due upon receipt. Unpaid invoices will require us to

withhold publication of any additional ads until account is paid in full. First time advertisers, Hamfest advertising, and Spotlight Page advertising is to be paid in advance. Please submit a check with order.

### SPECIFICATIONS & GENERAL

**ADVERTISING SIZES** are listed above. Ads that do not fit dimensions will be adjusted at no charge.

Digital copy is preferred, but hard copy is acceptable. Contact the editor for details.

**FULL COLOR COVER ADS**, when available, are to be sized for full 8.125 x 10.75 + bleed.

High resolution PDF preferred.

## Journal Mailing

If you should change your mailing address, please notify us at [membership@sera.org](mailto:membership@sera.org) so that we may update our mailing files. The Repeater Journal is not normally forwarded by the U.S. Postal Service, because it is sent by third class mail. As a rule we do request "address correction" when we conduct our mailings, but we do not always receive those updates from the USPS.

## Get The Journal

The Repeater Journal is mailed four times every year to members of The Southeastern Repeater Association. By joining SERA as a Full Member (repeater owner) or as an Associate Member (repeater user) you will be assured of getting this valuable magazine every quarter. The Repeater Journal is well worth the annual membership fee (just pennies a day), and you are also supporting a very worthwhile cause - the orderly and efficient coordination of our VHF/UHF repeater spectrum. If you have membership questions, feel free to inquire to [membership@sera.org](mailto:membership@sera.org).

*Remember, all new Repeater Journal Memberships expire at the end of the calendar year. If you need information concerning your membership you can email [membership@sera.org](mailto:membership@sera.org).*

## User Instructions for SERA UCS

Additional Instructions are available at [www.sera.org](http://www.sera.org)

**LETS GET REGISTERED IN UCS:** You must first register your call (or club Trustee call, if a club license) in UCS at: <http://scheart.us/sera/wp-login.php?action=register> The SERA UCS system will e-mail a password to the e-mail address you entered.

**PROFILE / REPEATER LISTING UPDATES AND CHANGES:** If you need to update your **Profile** or your repeater listing AND you have already registered go to: <http://scheart.us/sera/wp-login.php>, and login using your registered call and password. You will be taken to the SERA UCS page.

**HOWDY:** In the upper right corner of this screen, you should see "Howdy," and your name. Place your mouse over your name and the area will drop down and reveal the choices. Select "Edit My Profile" to go to that area. In the PROFILE page you should enter your contact information and the other required information. When complete, click UPDATE PROFILE located at the bottom of the page. Exit the Profile Section.

**COORDINATION TOOLS:** Click on Coordination Tools. This will open a new page where you will see OPTIONS. Click on BROWSE RECORDS and use your call. You will see a list of repeaters you are responsible for. Click VIEW for each repeater to see the data. On your initial visit, your repeater data may have some missing information such as antenna db and feed line type, etc. Information such as email, telephone, etc., should also be completed. At the bottom of the page you can select EDIT RECORD and SUBMIT the changes you made. Note that some fields are required and designated by a red asterisk.

**ADDITIONAL COMMENTS:** This is a required field and something must be entered. If you made minor informational changes add a statement something like "updating information" or a note to your coordinator or coordination that will be helpful.

**REVIEW:** When complete you can take a look and the system will process the new information.

**SUBMIT:** If all is OK at this point you should click on SUBMIT and your information or coordination request will be uploaded and your coordinator alerted with a copy.

**YOU MUST DO THIS FOR EACH REPEATER LISTED UNDER YOUR CALL** You will receive a return email from UCS noting that you have made changes and that your "Application for Frequency Coordination has been submitted." Remember, the TRUSTEE of the repeater is responsible for keeping the records current in the SERA UCS and also with the FCC. If your Club Trustee changes, the information must also be changed with the FCC or UCS will generate an error to the coordinators. Trustee rules are defined by the FCC and not SERA and they are specific.

**SERA MEMBERSHIP:** Got to [www.sera.org](http://www.sera.org) and select the membership information. You can join our group on line or with the traditional paper method.

Contact your Director or Vice Director if you need more information.

**Visit SERA on the Web**
